

HIGH DENSITY VERTICAL CABLE MANAGERS

DESCRIPTION

Datacom High-Density Vertical Cable Managers are specially designed to meet the challenges of high-density cable management, driven by the increasing number of patch panels per rack and the introduction of angled jack panels.

The cable manager frame is manufactured from high-quality steel sheet, which is punched, formed, welded, and powder-coated to ensure superior strength and durability. The doors are made from steel or aluminum sheet, also punched, formed, and powder-coated, meeting the highest quality standards to deliver a reliable and premium product.

Standard configurations are available in 6", 8", 12", and 15" widths. These units feature a unique double-hinged door on both the front and rear, along with removable and reusable fingers made of durable polycarbonate material. The product is available in both front-only and front-and-rear configurations to suit different installation requirements.

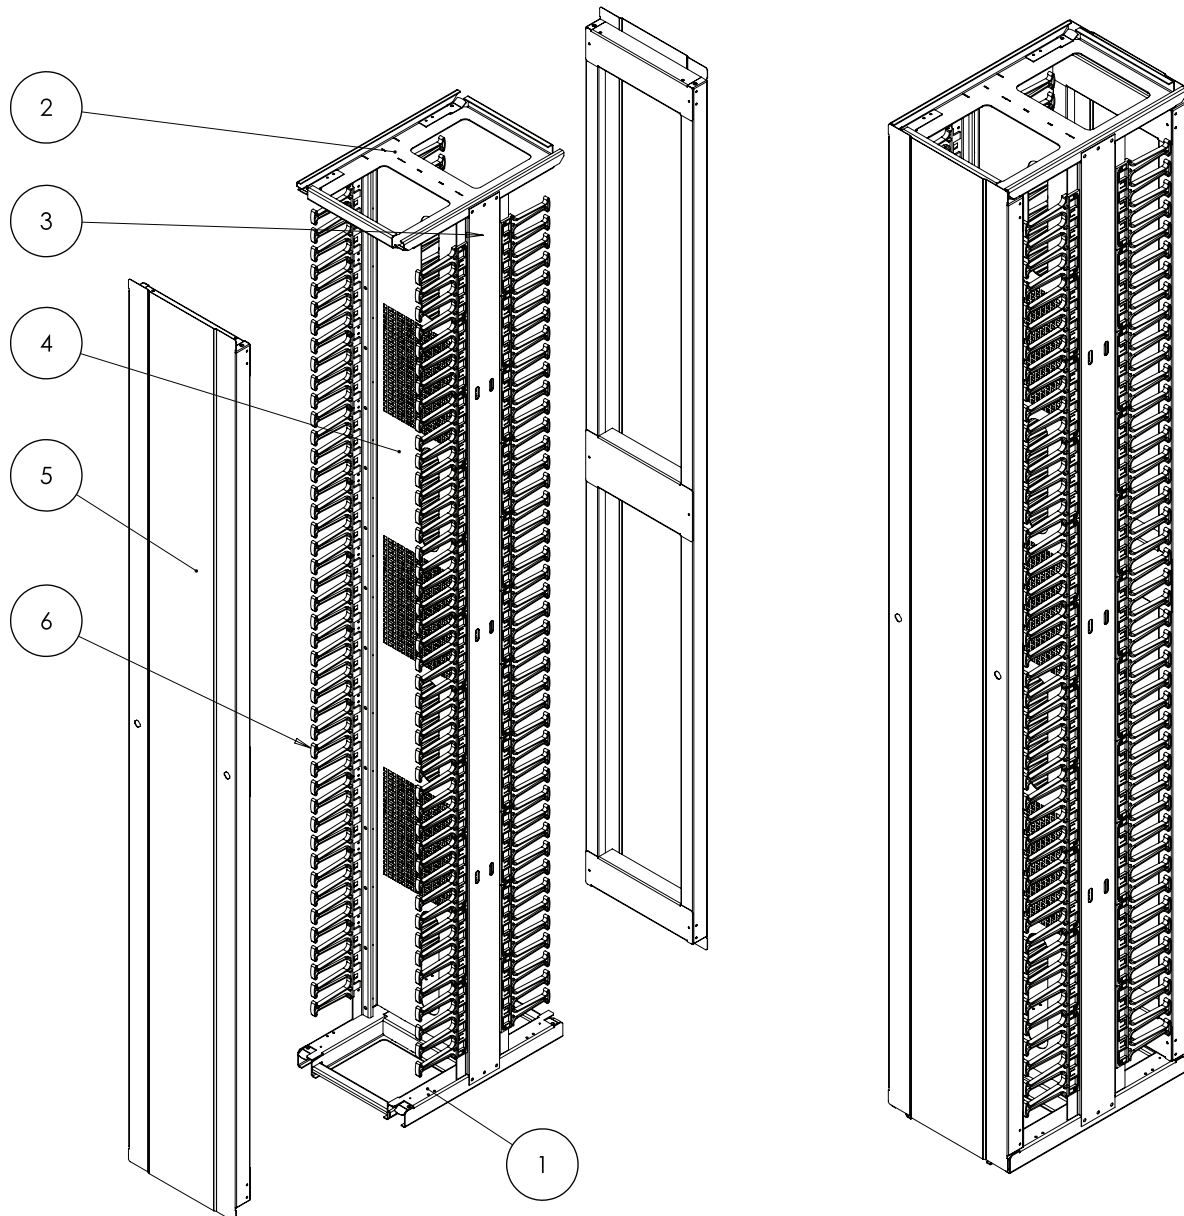

FEATURES

- Fingers can be removed very easily to suit site requirements.
- Unique double-hinged door design at front and back allows the door to open from left to right or right to left for easy cable management.
- The vertical cable manager is free-standing on the floor and can be bolted to open racks for better alignment and improved aesthetic appearance.
- Composite construction: basic frame made of powder-coated steel and fingers made of polycarbonate for high strength to carry large quantities of cables.
- Cable spools and slots are provided in the center support member for efficient high-capacity cable management.
- Polycarbonate fingers ensure no cable damage during installation or maintenance.

HIGH DENSITY VERTICAL CABLE MANAGERS

PRODUCT DETAILS

- 1-HDVCM-Bottom.
- 2-HDVCM-Top.
- 3-HDVCM-Side.
- 4-Center Plate.
- 5-Door Assembly.
- Finger Loop.
