

SINGLE MODE G657A2 GELL FREE MICRO MODULE INDOOR CABLE

DESCRIPTION

Datacom indoor micro module (multitube) features a non-metallic construction that eliminates the need to ground or bond. This cable is available with single mode fibre OS2 rated Reduced water peak (RWP) meets OS2 (ITU-T G.657.A2) and fibre counts from 24 to 144 fibres as a multi tube design. Indoor Multitube distribution optical fibre Cables are constructed using 12-fiber subunits. This family of fibre optic distribution cables shall be suitable for indoor applications, complying with IEC standards for low smoke zero halogen (LSZH)

APPLICATION

- Specifically designed for indoor applications.
- Used as a Backbone distribution Cables between the floor Telecom room and Main Telecom Room.
- LAN & WAN Networking.
- Campus backbone applications.
- Telecommunications
- Network wiring closets
- Audio / Video System
- Security System

FEATURES

- LSZH outer Sheath.
- Reduce installation time and cost.
- Easy Jacket removal using standard tools.
- High Modulus, Aramid yarn as a peripheral strength member.
- LSZH sheath makes the cable suitable for higher fire safety requirements
- Requires no grounding or bonding due to all-dielectric construction
- Flexible and Fire-retardant outer sheath with aramid yarns as tensile elements help in easy installation in space-constrained areas
